STANDARD SIX MID TERM TWO EXAM 2018 SCIENCE

The diagram below shows parts of the 1. male reproductive sex cells

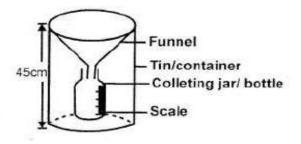

Which letter represents the part that produces male reproductive sex cells? A.O **B.** N C.L D.M

- 2. Which one of the following is not a sign of malaria?
 - A. Chest pains
 - B. Feeling cold and shivering.
 - C. Vomiting and diarrhoea.
 - D. Pain in the joints
- 3. Digestion of food takes place in all the following parts except:
 - A. mouth B. liver
 - C. small intestine D. stomach
- 4. All the following animals are mammals except A

neep	B. shark
on	D. whale

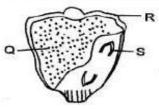

5. The diagram below shows a simple weather instrument.

Which statement is false about the above weather instrument?

- A. It is used to measure the amount of rainfall.
- B. The collecting jar should be narrow and clean.
- C. It should be placed on top of the roof.
- D. The scale should be labelled in millimetres.
- 6. Which group below consists of the pistil only?
 - A. Sepal, stigma and anther
 - B. Anther and filament.
 - C. Flower stalk and petal
 - D. Stigma, ovary and style
- 7. After how below long does ovulation take place in human beings?
 - A. 32 days
 - B. 28 months
 - C. 28 days
 - D. 56 days

8. The diagram shows parts of a maize seed

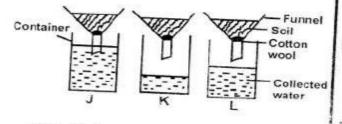

Name the parts marked Q, R and S respectively.

- A. Endosperm, seed coat, plumule.
- B. Cotyledon, testa, plumule.
- C. Testa, endosperm, radicle.
- D. Endosperm, testa, radicle
- 9. Which one of the following is not an immunizable disease?
 - A. Measles
- B. Cholera
- C. Malaria
- D. Yellow fever

- 10. Which pair of plants below have the same | 16. Which one of the following is not an effect
 - A. Onions and carrot
 - B. Maize and peas.
 - C. Peas and beans.
 - D. Kales and rice
- 11. Medicines that are used to treat known diseases are called:
 - A. vaccines
 - B. supplementary medicines
 - C. pain relievers.
 - D. curative medicines
- 12. Which weather instrument below is mainly used to show the direction of wind? A. Windvanes
 - B: Air thermometer
 - C. Raingauge

 - D. Liquid thermometer
- 13. Which one of the following is not a characteristic of a whale?
 - A. Body covered with fur.
 - B. Lays fertilised eggs.
 - C. Breathes through lungs.
 - D. Has a constant body temperature.
- 14. The set up drawn below was used to investigate a certain property of soil

Which letter represents the soil that is sand soil? A.J B.K. CJ

- D. None.
- 15. The following are conditions necessary for seed germination except A. Soil

 - C. Warmth
 - n Moisture

CISTINCTION CO3 - 2018

- of HIV/ AIDS infection on the nation?
 - A. Loss of well trained people.
 - B. General feeling of shock.
 - C. High number of school dropouts
 - D. Congestion in hospital
- 17. Which part of the female reproductive system gives room for fertilisation? A. Oviduct B. Uterus
 - C. Vagina
- 18. The following nutrients help in the formation of strong bones and teeth except: A. Phosphorous

D. Ovary

- B. Calcium
- C. Vitamin D
- D. Iron
- 19. From the diagram below the name of the part marked Z is

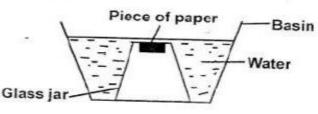

A. ovary C. vagina

B. womb D. oviduct

- 20. Exchange of air in the breathing system takes place in the A. air sacs B. diaphragm C. nose
 - D. trachea
- 21. Which one of the following is not a reason why we should go for HIV testing?
 - A. To know our status.
 - B. To overcome fear.
 - C. To spread the virus.
 - D. To campaign against HIV/AIDS
- 22. The following are all characteristics of wind pollinated flowers. Which one is not? A. They produce many light pollen grain.
 - B. They are usually dull in colour. C. They have hainy stigma

 - D. They are large in size.

- 23. Standard six pupils from a certain school were told to collect the following materials
 (i) Wire
 - (ii) Strong polythene paper (iii) Strong string (iv) Strong pole The weather instrument they were to construct is
 - A. Liquid thermometer. B. Windsock
 - C. Windvane D. raingauge
- 24. Which of the following animals is a reptile? A. Chameleon B. Frog C. Newt D. Salamander
- 25. Which one of the following is not a poor conductor heat? A. Nail C. Glass D. Bone
- Standard five pupils from Nalondo primary school carried out the experiment shown below

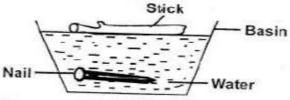

From the above set up, the pupils concluded that,

- A. liquids occupy space
- B. air has definite mass
- C. gases occupy space
- D. liquids take the shape of the container.
- 27. Digestion of food ends in the A. large intestine B. stomach C. anus D. small intestine
- 28. Which one of the following is not a characteristic of clay soil?
 - A. It retains least amount of water.
 - B. It has the smallest particles.
 - C. It has the highest capillarity.
 - D. It is used in modelling
- 29. The loudness or softness of sound is carled A. noise B. volume

7 milat

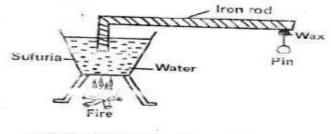

n.	nor	se	
~	- 20		A. 4.00

- 30. Which material is not needed when comparing capillarity in soil? A. Water
 - R Pire
 - B. Biro pen casing
 - C. Pieces of cloth
 - D. Collecting jars.
- 31. Which one of the following is not a physical change in adolescent girls?
 - A. Widening of the shoulders.
 - B. Menstrual flow begins.
 - C. Hair grows under the armpit
 - D. They start producing mature sex cells
- 32. Pollen grains are produced on the A. stigma B. anthers
 - C. ovary D. petals
- 33. Which one is a product obtained from a sheep?
 - A. Dairy B. Eggs C. Mohair D. Mutton
- Moraa placed a very big stick and a nail on water as shown below

She concluded that

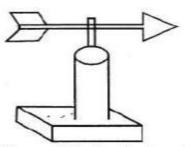

- A. mass affect sinking and floating
- B. size affects sinking and floating
- C. type of material affect floating and sinking
- D. shape does not affect floating and sinking
- 35. The experiment below was done by class five pupils

meat reached the wax through which method of heat transfer?

36.	Which one of the following is not a				
	characteristic of liquids?				
	A. They expand when heated.				
	B. They have indefin	-			
	C. they have definite				
	D. They condense when cooled				
37.	The quantity of matter in an object is called				
	A. solid	B. mass			
	C. volume	D. weight			
38.	Which one of the foll	owing is not a part of			
	female reproductive systems?				
	A. Urethra	B. Uterus			
	C. Oviduct	D. Cervix			
39.	Which of the followin last to be shed?	g types of teeth is the			
	A. Premolars	B. Canines			
	C. Incisors	D. Molars			
	0. 1103013	D. Molaro			
40.	Which soil has the best capillarity?				
	A. Sand				
	B. Loam				
	C. Clay				
	D. Both sand and loa	am			
41.	Which one is not an invertebrate?				
	A. Grasshopper				
	C. Housefly	D. Lizard			
42.	. The best requirement for good health for				
	a sick person is				
	A. rest				
	B. medical care				
	C. exercise				
	D. sleep				
43.	Which plant below c	annot make its own			
	food through photos	ynthesis?			
	A. Fern	B. Sisal			
	C. Mould	D. Moss			
	Which component of	f soil is made up of			
44.	dead decayed matter?				
44.	dead decayed matte				
44.	dead decayed matter A. Mineral particles.				
44.	and the second				
44.	A. Mineral particles.				

45. The arrow of the weather instrument drawn below was seen pointing South

From which direction was the wind blowing? A. East B. West

- C. South D. North
- 46. Which of the following can be controlled by draining stagnant water around our homes?
 - A. Malaria
 - B. Tuberculosis
 - C. Rickets
 - D. Marasmus
- 47. Which one of the following is not a fibre crop?
 A Sisal
 B Sunflower

A. Oladi	D. Ournower
C. Palm tree	D. Cotton

- 48. The following are all characteristics of nimbus clouds except A, they are dark grey in colour.
 - B. they appear low in the sky.
 - C. their presence is a sign of heavy rain.
 - D. they look like bundles of cotton wool
- 49. Which pair of types of teeth are you not likely to use when eating groundnuts?
 - A. Molars and incisors
 - B. Canines and premolars
 - C. Incisors and canines
 - D. Premolars and molars
- The following are proper ways of storing medicine except
 - A. using medicines for their recommended purpose.
 - B. keeping medicines away from direct sunlight.
 - C. storing medicines in lockable cupboards.
 - D. not storing medicines in soda bottles.
